

## **Refinery Emissions Monitoring Workshop Hilton Pensacola Beach – Pensacola Beach, Florida November 15, 2021**

**Learn More about Emissions Monitoring and Reporting Requirements under the Refinery Sector Rule**  
With a variety of different types of sources, refineries are subject to emissions monitoring, testing, and reporting requirements under Subparts J and Ja of EPA's 40 CFR Part 60 performance standards but also under Subparts CC and UUU of the national emission standards for hazardous air pollutants in 40 CFR Part 63. The interrelated rules, collectively known as the Refinery Sector Rule, include different emission monitoring and/or process monitoring options that may be used to demonstrate compliance along with QA/QC obligations and reporting requirements that need to be met on an on-going basis.

Agora Environmental Consulting is conducting a one-day training workshop to help you understand the monitoring options and ensure that you are meeting the regulatory requirements. Designed both for environmental personnel and the instrument technicians that maintain the monitoring equipment, the training will cover the practical implementation details for refineries under Subparts J and Ja of Part 60 and Subparts CC and UU of Part 63. Topics will include:

- Regulatory Overview & Applicability
- NSPS Requirements (Subparts J and Ja)
- MACT Standards (Subpart CC and UUU)
- Flare Monitoring
- Emission Calculation Details
- Part 60 CEMS QA/QC
- Recordkeeping and Reporting Requirements
- Regulatory Updates

The Refinery Emissions Monitoring Workshop will be held at Hilton Pensacola Beach in Pensacola Beach, Florida on November 15, 2021 from 9:00am to 4:00 pm. While a separate event, the workshop is being conducted in conjunction with the ESC Spectrum Users Group Meeting, which begins the following day at the same location. The cost to attend the Refinery Emissions Monitoring Workshop is \$450 and includes a workshop manual, coffee breaks, and lunch. It does not include travel costs or hotel accommodations.
